

Gabriela earned her PhD in micro- and molecular biology at the Technical University, Berlin, and then spent some years in an academic environment, including as principal investigator for several research projects incl. EU funding. Being fascinated by science management she moved to Fraunhofer where she became the Manager in Research Coordination Life Sciences, Fraunhofer Headquarters. Here she was involved in strategic research planning in the Life Science field with respect to strategic and R&D portfolio aspects. This experience led to the role as Head of Corporate Business Development Life Sciences at Fraunhofer Headquarters in Munich where she brought together the expertise of the Fraunhofer Institutes with industry partners requiring research and development support. Since 2018 she holds the position of the Stabstelle Strategic Business Development reporting directly to the Executive Vice President Technology Marketing and Business Models.
