Actions

4. Tighten the Relay Bracket screws

5. Insert the relay into the bracket

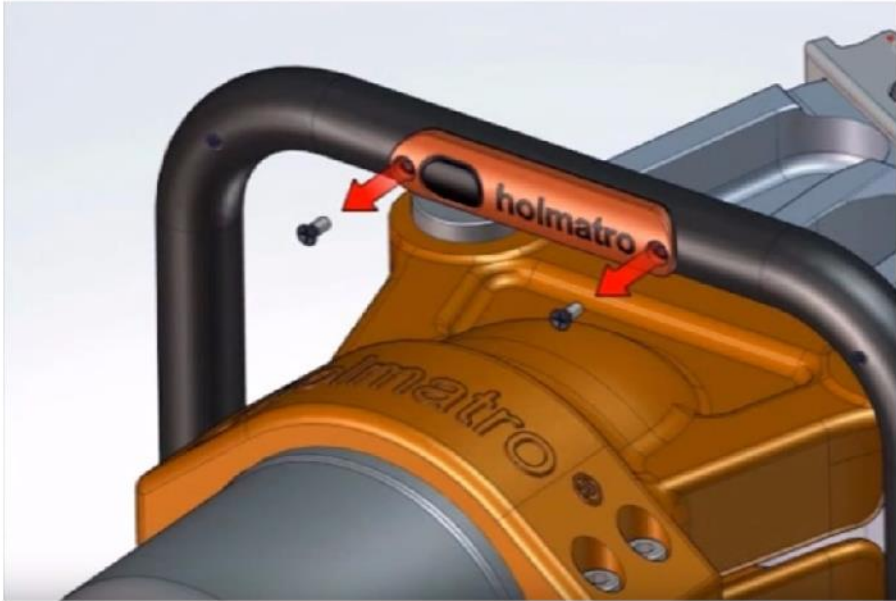

6. Connect the Relay

7. Tighten the Relay screws

8. Position the Pedestal

9. Insert the Pedestal

10. Tighten the Pedestal screws

Back

Next

Description

Tighten the two allen screws, discs and spring discs

Tools

Allen key 3/32"

Fields

Torque:

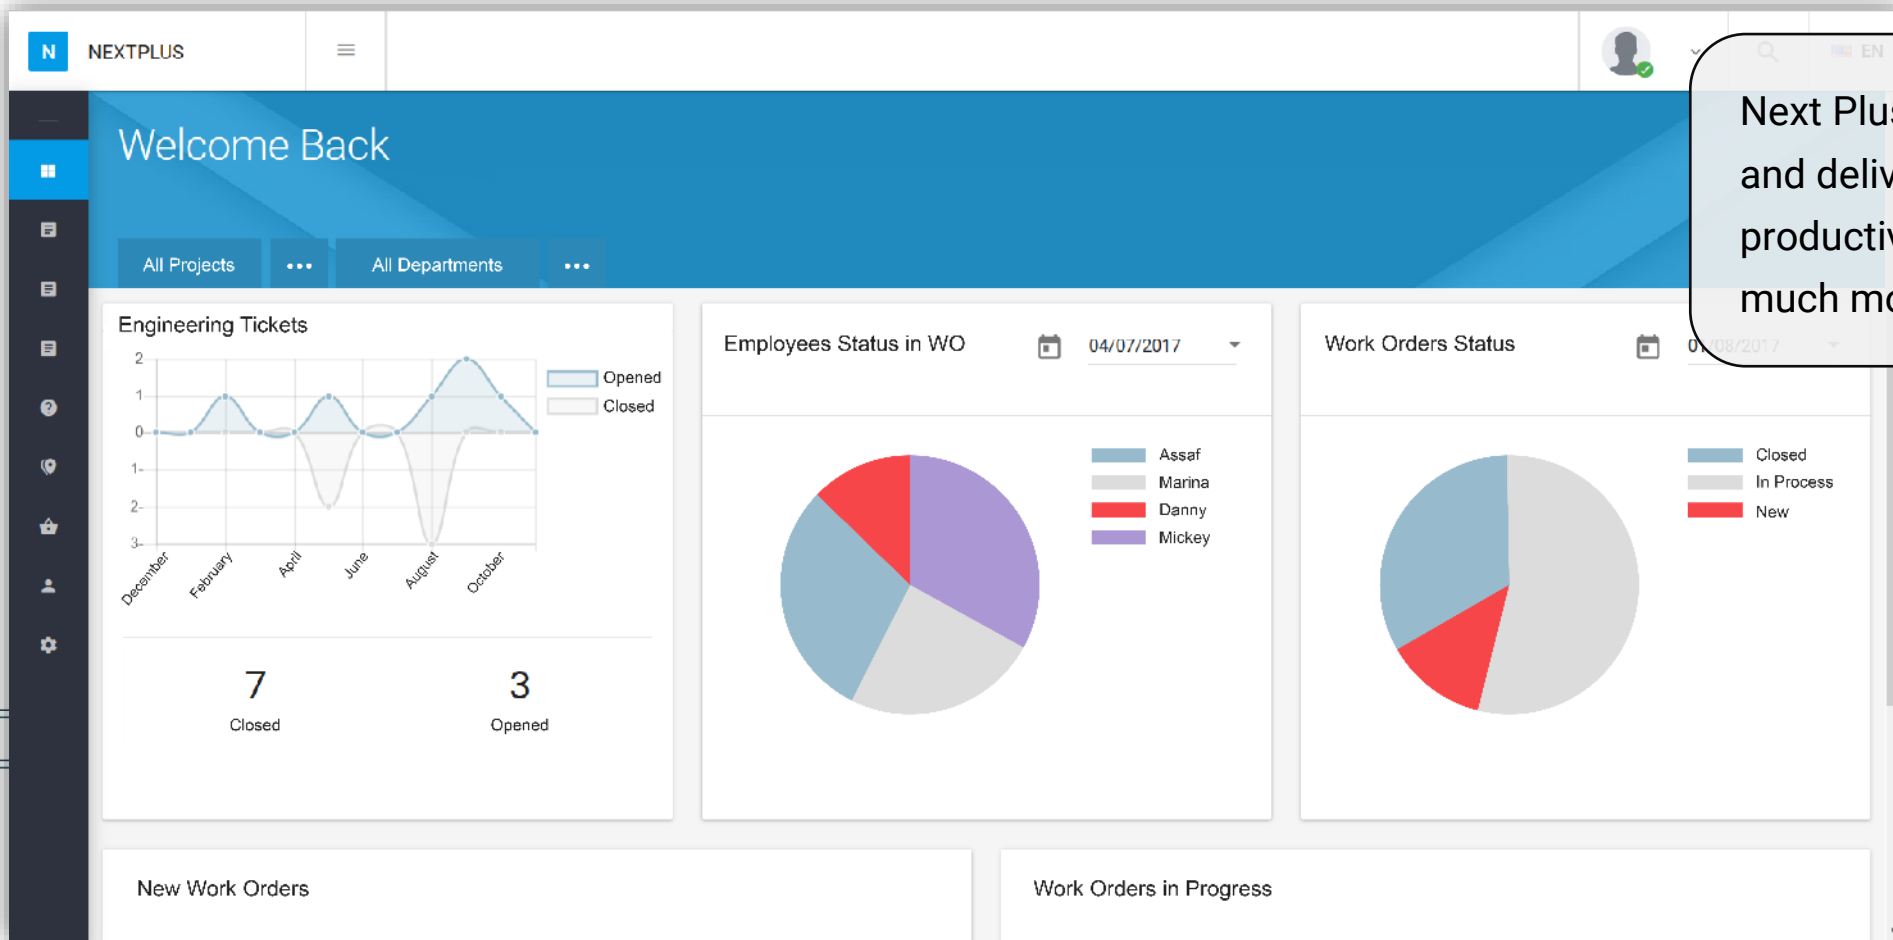

Next Plus asks the relevant questions, requests input, connects to sensors (IIoT) & systems, and automatically adjusts the process

# Actionable Insights

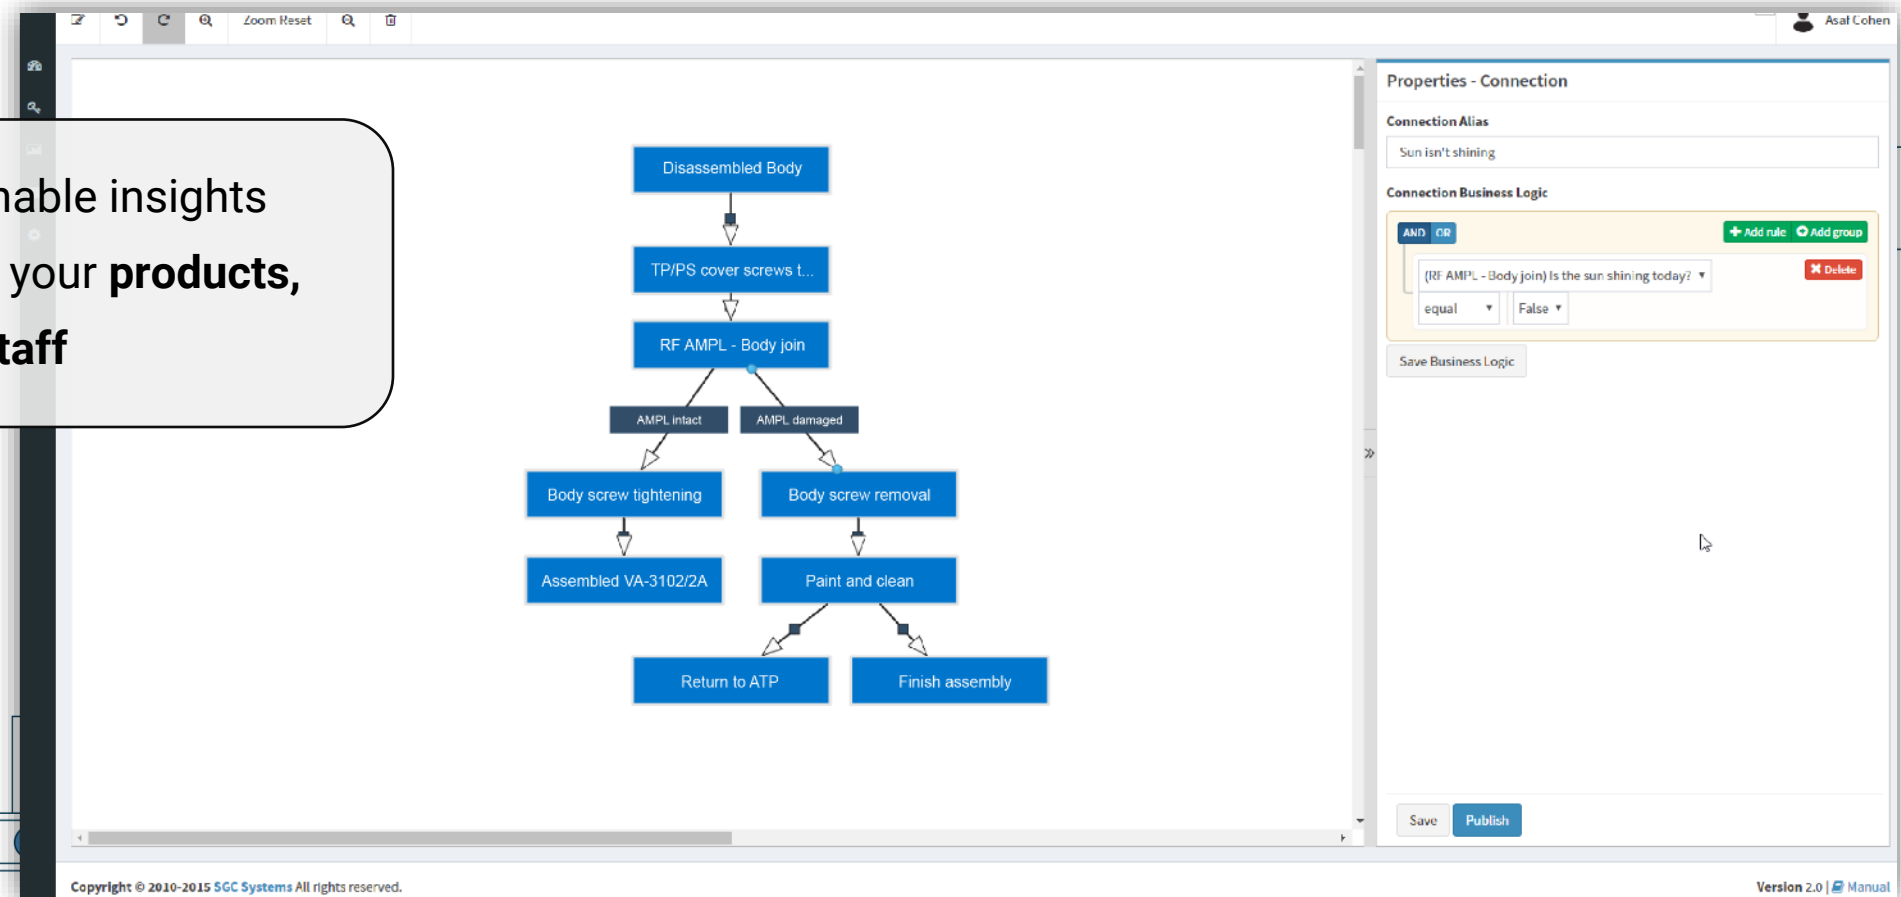

Next Plus digests all the data collected and delivers **actionable insights** about productivity, quality, personnel and much more.

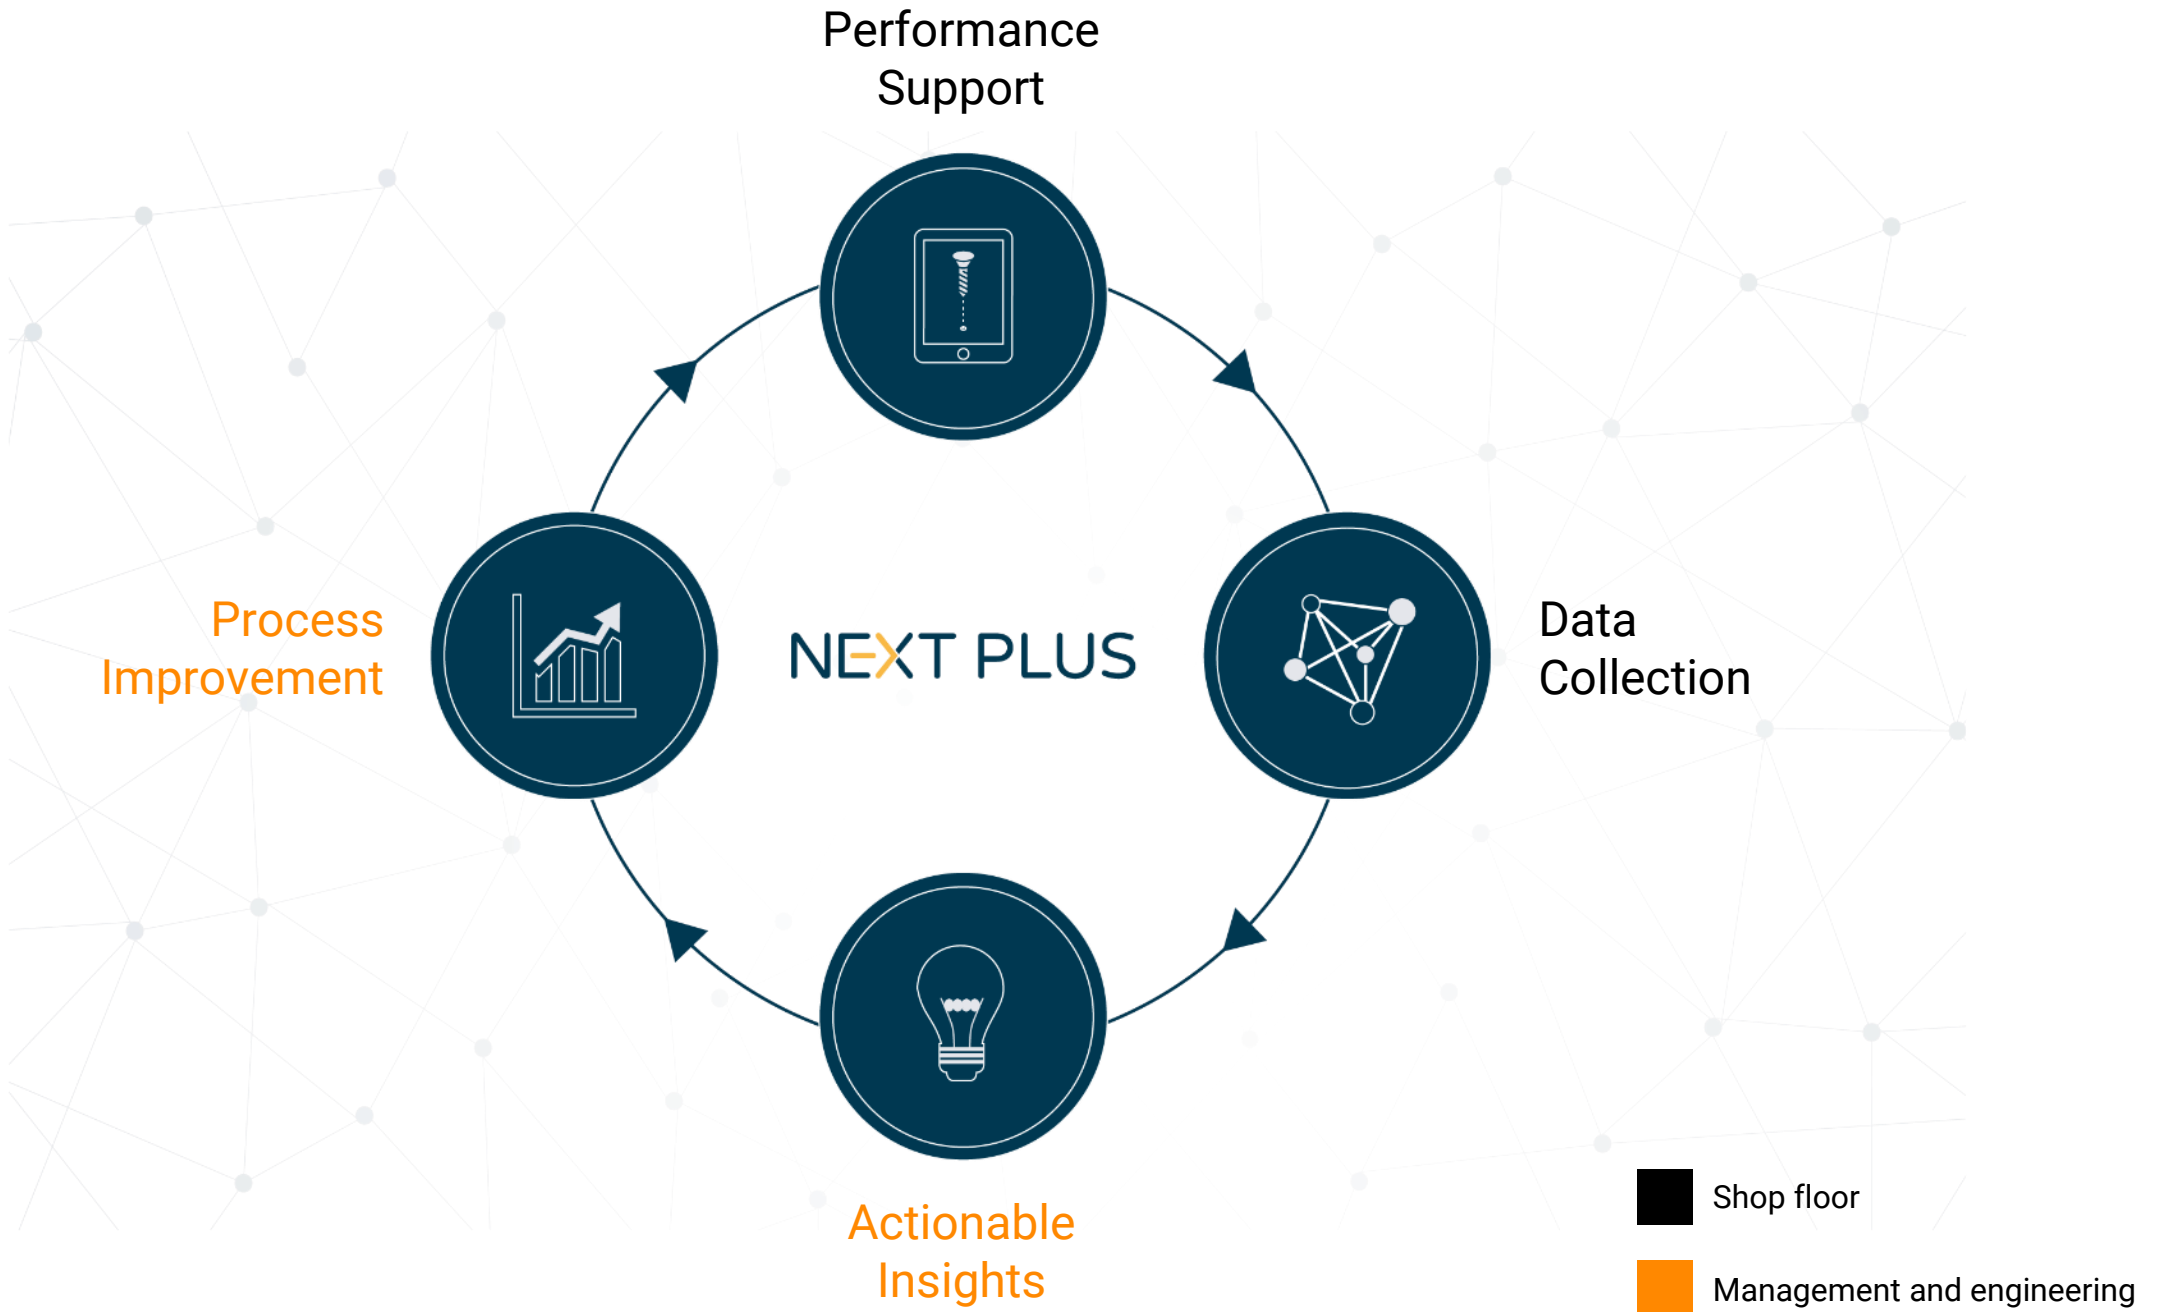

# Process Improvement

With these actionable insights you can **improve** your **products**, **processes** and **staff**

# What our customers say

## Training Manager

"One of the biggest challenges of a training manager, is to minimize training time as much as possible. Saving the organization pricy resources and valuable time. In that regard, Next Plus has managed to dramatically improve training efficiency."

"In one of our case studies, from a 30-day training session for new customer technicians, we were able to **decrease to an 18-day session**, by using Next Plus for on job performance support. **That's 40% decrease in training time!** But the really important part is that all this was done with **no decrease in the quality metrics** of the technicians over time."

# What our customers say

## Operations Manager

"Before Next Plus many of the most basic operations on the production floor would be time consuming, costly and would lack tracking abilities."

"Now, thanks to Next Plus, personnel **training time has decreased by 30%** and **production reporting time has gone down by 70%**. Moreover, all essential manufacturing data has been aggregated into a single point of entry solution, allowing me to draw **insights about quality, personnel and much more.**"
